

Animal Health Clinic of Funkstown
Authorization for Anesthesia and/or Surgery for Felines

The Standard of
Veterinary Excellence

Client Name: _____

Pet's Name: _____

Species: **Feline**

Breed: _____ Age: _____ Sex: Male Female Neutered Spayed

Anesthetic and surgical procedure(s) to be performed: anesthesia castration ovariohysterectomy (spay)
 declaw lumpectomy biopsy dental exploratory other _____

I, the undersigned owner or agent of the owner, of the pet identified above, certify that I **am** or **am not** eighteen years of age or over and authorize the veterinarian(s) at _____ to perform the above procedure(s). I understand that some risks always exist with anesthesia and/or surgery such as, but not limited to: infection, cardiac arrest and death. I am encouraged to discuss any concerns I have about those risks with the attending veterinarian before the procedure(s) is/are initiated. My signature on this form indicates that any questions I have regarding the following issues have been answered to my satisfaction:

- The reasonable medical and/or surgical treatment options for my pet
- Sufficient details of the procedures to understand what will be performed
- How fully my pet will recover and how long it will take
- The most common and serious complications
- The length and type of follow-up care and home restraint required

While I accept that all procedures will be performed to the best of the abilities of the staff at this hospital, I understand that no guarantee or warranty has been made regarding the results that may be achieved. I assume financial responsibility for the fees, and will provide payment via cash, credit card, or check at the time my pet is discharged from the hospital. Should unexpected life-saving emergency care be required the hospital staff has my permission to provide such treatment and I agree to pay for such services. It has been explained to me that conditions may rise during this procedure whereby a different procedure may need to be performed, and I authorize the veterinarian to do what they feel is needed and necessary.

If I neglect to pick up my pet within 5 days of notification by the doctor or staff that my animal can be discharged it will be considered abandoned and may be disposed of, or destroyed, as the clinic deems best.

I have informed the admitting veterinarian or technician of any current or historical illness my pet has had that may be relevant to its treatment. **I am aware there may be an additional fee if my pet is obese, in heat or pregnant.**

Phone number(s) at which you or your agent can be reached today and/or tomorrow.

I would prefer to be texted with updates on my pet? Yes No

(i.e. liver, kidney, heart problems, in heat, pregnant, etc.)

Microchip is a Permanent Pet Identification and is a proven way to successfully recover your pet if it should be lost or stolen.

YES NO already has a microchip **Microchip Id:** _____

PRE-ANESTHETIC BLOOD TESTING: Anesthesia carries some risk. Therefore, blood testing is recommended before general anesthesia. The anesthetic agents are often removed from the body by the kidneys and liver, so it is important to know before anesthesia that these organs are functioning correctly. The CBC helps us to determine if your pet is anemic (can be a cause of excessive bleeding). The blood work helps us make the determination to proceed with surgery or not. If there is any indication of organ dysfunction, then appropriate steps can be taken to ensure the safety of your pet.

INITIAL IF YES _____ FOR BLOOD WORK INITIAL IF NO _____ FOR BLOOD WORK

INITIAL IF _____ BLOOD WORK HAS BEEN PERFORMED WITHIN LAST 30 DAYS Date: _____

REMEMBER: Blood work is REQUIRED for all pets 7 years of age or older and for any pet with any pre-existing medical condition that may increase the risks of anesthesia.

FELV/FIV Testing: FELV is spread when the saliva of an infected cat comes into contact with your cat. For example: mutual licking, grooming, sharing food and water bowls or fighting. FIV virus is in the blood of the infected cat, and it is spread when one cat bites or scratches another. These viruses are highly contagious and fatal. Both viruses can be detected by a blood test.

INITIAL IF YES _____ FOR FELV/FIV TEST INITIAL IF NO _____ FOR FELV/FIV TEST

Laser Therapy: Laser therapy has been proven to reduce pain, reduce inflammation and speed healing. The additional fee for post-operative laser therapy:

INITIAL IF YES _____ FOR LASER THERAPY INITIAL IF NO _____ FOR LASER THERAPY

Cerenia Injection: A cerenia injection will help prevent nausea and vomiting and improves recovery in pets undergoing surgery.

INITIAL IF YES _____ FOR CERENIA INITIAL IF NO _____ FOR CERENIA

I have read and fully understand the terms and conditions set forth above.
